

Improve organizational efficiencies and Achieve Enterprise Compliance with GyanSys' GRC Offerings

The GyanSys Package consists of the following components

In depth understanding of Multiple Compliance Frameworks

Leverage SAP GRC offerings with GyanSys' expertise

Unify your compliance initiatives with the GRC experts from GyanSys

1: Access Control (AC 10.0)

GyanSys' AC Package offers:

Implementation: Rapid Deployment Solution (RDS) of all 4 modules of GRC AC 10.0; Access Risk Analysis (ARA), Business Role Management (BRM), Access Request Management (ARM) & Emergency Access Management (EAM) with standard SAP out-of-the-box.

Customized Solutions: GyanSys' expert SAP GRC architects work diligently to understand your business requirements and provide cost effective solutions.

Best Practices: Adopt a simplistic approach while incorporating the best practices in delivery, to achieve smooth implementation, at minimal post go-live maintenance costs, in a short duration of 6 months.

2: Global Trade Services (GTS)

Our experienced consultants have enabled global organizations make most of their SAP GTS investment.

GyanSys' GTS offering includes:

Delivery: Implementation of SAP GTS 3.0 through 10.1

Customs Processing: Alleviating inefficiencies in Supply Chain by providing assistance with accurate filing of AES, ATLAS, 10+2 ISF

Compliance within business processes: Enabling alignment with ITAR, EAR norms

Risk Management: Improving the business' bottom lines with Restitution & Preference services

3: Process Control (PC)

Proof of Concept: Benefit from the expert opinion of GyanSys' GRC Process Control consultants on how to complete the SOX vision & support new frameworks, process integration with Risk Management, Access Control and Financial Performance Management

4: Risk Management (RM)

Cohesive risk management process while leveraging Process Controls & testing results

One comprehensive solution partner for all your SAP GRC needs

Critical Business Issue

Maintaining compliance to international, national and regional legal policies and standards pose a huge concern to large enterprises. In order to balance these unique challenges, while ensuring ongoing strategic focus, astute global organizations require an integrated management of Governance, Risk and Compliance (GRC).

Some of the key GRC management issues include:

- Minimizing Cost escalations as a result of territorial approaches to internal controls repositories, access provisioning and Segregation of Duties (SoD)
- Mitigating risks arising as a result of potential compliance violations
- Avoiding myopic decision making processes among managers & investors owing to locally focused GRC

GyanSys' Value Proposition

Cost Effective	We evaluate your organization's GRC requirements, perform gap analysis, review options and provide recommendations. Our Rapid Deployment Solutions (RDS) and flexible onsite offshore delivery model, ensures speedy and effective solutions to our clients.
