

# Simplify the online time tracking process on SAP by leveraging GyanSys' innovative gCATS tool

## The GyanSys' gCATS solution is designed to aid organizations implement online time tracking in SAP HCM

gCATS is a nifty tool which functions as a standalone bolt-on product and neatly fits in to your existing SAP system. Following are the key features this tool boasts of:

- Enhanced user friendliness compared to SAP GUI CATS (Cross Application Time Sheet)**

Enables entry of more than 20 lines in one screen and provides access to 360° calendar view. Supports data validation on real-time basis & personalization with multiple objects. This includes a collapsible calendar, marking holidays & other important dates as well as a menu for a holistic view of employee master data. The calendar displays past vacations and special time types

- Customer Centric**

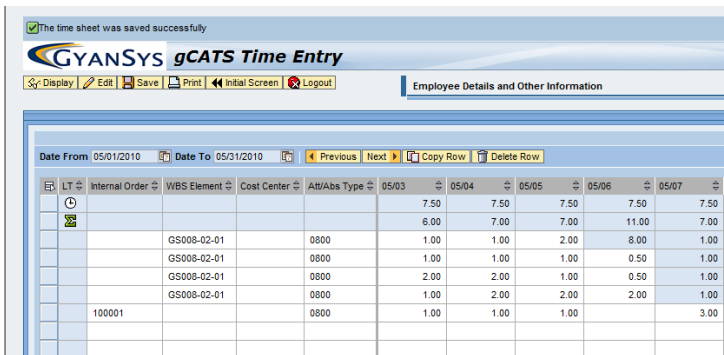

Developed purely based on customer feedback and extensive research on user experience.

- Robust Performance and Easy Customization.**

Leverages all standard SAP configuration and is developed on a NetWeaver platform using ABAP/4 language, using the SOA methodology. This tool can be easily embedded within any Portal & allows quicker user response than ESS Time Entry Application.

- Increased stringency in security features**

It provides improvised security features using standard SAP role authorization with a graphical alert mechanism

### The gCATS Time Entry Header

**gCATS – The missing tool in your company's SAP HCM puzzle**

# One user friendly tool to accelerate the time tracking process in your organization

## Critical Business Issue

As organizations expand, there is an increasing need to have a simple, efficient and user friendly tool to track and maintain employee time data.

Following are some critical functional requirements, that resonate across clients:

- A portal with simple yet effective user interface to enter & track all employee time related information
- Provision to access data across multiple platforms with minimal effort
- Ability to smoothly integrate with the existing IT infrastructure
- Flexibility to adapt to the evolving organizational requirements, thus enabling straight forward customizations

## GyanSys' gCATS Tool Value Proposition

<b>User Friendly</b>	gCATS is an online web tool for entering time against projects, made accessible using a web link thus rendering it easily deployable across the organization
<b>Easy Integration</b>	The tool is tightly integrated to the SAP CATS configuration. Considering it works on a standard SAP framework, it can be easily customized to meet customer specifications. Additionally, the tool is developed on ABAP WebDynpro, thus enabling accessibility via iOS & Android platforms.
<b>Cost &amp; Time Effective</b>	GyanSys' gCATS offering is priced competitively and has proven to lower the time involved in entering and monitoring employee data by half.
